## WELL WATER TESTING

This form contains information regarding well water testing. Certification requires that when public water is not available, the water shall be tested and found to be **bacteriologically safe** and to have **safe nitrate levels** by a laboratory certified under 42 CFR 493 (CLIA) prior to initial certification and at least every following 2 years. The following information was obtained on the Department of Natural Resources website ([www.dnr.state.wi.us](http://www.dnr.state.wi.us)) as well as through phone contact with the labs below.

*Laboratories in Dane, Columbia, and Walworth Counties that perform well water testing:*
